09 Childcare practice policy

Alongside associated procedures in 09.1-09.15 Childcare practice, this policy was adopted by *Swanmore Pre-school* on 13th November 2024.

Aim

Children are safe, happy, and eager to participate and to learn.

Objectives

- Babies and young children need to form a secure attachment to their key person when they join the setting to feel safe, happy, and eager to participate and learn. It is their *entitlement* to be settled comfortably into a new environment.
- The needs of part-time children are considered.
- There is a procedure for when children do not settle and for prolonged absences.
- Introductions and induction of the parent is carried out before children start.
- *Prime times* of the day make the very best of routine opportunities to promote 'tuning-in' to the child emotionally and create opportunities for learning. We actively promote British values, inclusion, equality of opportunity and the valuing of diversity.
- We operate a positive behaviour management approach. Behaviour management procedures cover how staff should respond to all aspects of behaviour, including children who exhibit challenging behaviour towards other children. These procedures build on the Early Years Alliance's approach to learning based on three key statements.
 1. Learning is a lifelong process, which enables children and adults to contribute to and shape their world.
 2. We want the curriculum we provide to help children to learn to:
 - be confident and independent.
 - be aware of and responsive to their feelings.
 - make caring and thoughtful relationships with other people.
 - become increasingly excited by, interested in, and knowledgeable and questioning about the world around them.
 3. We provide a wide range of interesting child-chosen and adult-initiated activities which:
 - give children opportunities to use all their senses.
 - help children of different ages and stages to play together.
 - help children be the directors of their own learning.

- help children develop an inquiring and questioning attitude to the world around them.

The *Early Years Foundation Stage* is used as a framework to provide care and learning opportunities for children.

Our vision statement reads as follows

We aim to provide a safe, nurturing, and engaging environment where the children can develop and learn through play to reach their own potential. We believe that children should have the opportunities to explore, engage and focus their attention with the flexibility to plan in the moment following the child's interest and what motivates them, and opportunities to extend what they know.

We aim to support children to become Confident, independent, resilient young people ready to move onto their next journey and wish for them to develop a rich vocabulary to support a lifelong curiosity for learning.

To feel securely settled and ready to learn, children from two to five years need to form attachments with adults who care for them, primarily to a key person, but with other adults and children too. In this way children feel part of a community of learners; they can contribute to that community and receive from it. The three-stage model is applicable, but with some differences in the procedures for children moving up into the next group and for older children.

About our childcare and early education

Welcome to Swanmore Pre-school and thank you for registering your child with us.

We know how important your child is and aim to deliver the highest quality of education and care to help them to achieve their best.

This document aims to provide you with an introduction to Swanmore Preschool, our routines, our approach to supporting your child's learning and development and how we aim to work together with you to best meet your child's individual needs. This should be read alongside our Childcare and Early Education Terms and Conditions for a full description of our services.

Our setting aims to:

- provide high quality care and education for children
- work in partnership with parents to help children to learn and develop
- add to the life and well-being of the local community
- offer children and their parents a service that promotes equality and values diversity

Parents/carers

You are regarded as members of our setting who have full participatory rights. These include a right to be:

- valued and respected
- kept informed
- consulted
- involved
- included at all levels

Children's development and learning

We aim to ensure that each child:

- is in a safe and stimulating environment
- has a named key person who makes sure each child makes satisfying progress and is your link to our setting
- is given generous care and attention, because of our ratio of qualified staff to children, as well as volunteer helpers
- has the chance to join in with other children and adults to live, play, work and learn together
- is helped to take forward her/his learning and development by being helped to build on what she/he already knows and can do
- is in a setting that sees parents/carers as partners in helping each child to learn and develop
- is in a setting in which parents/carers help to shape the service it offers

The Early Years Foundation Stage

Provision for the development and learning of children from birth to five years is guided by the Early Years Foundation Stage. Our provision reflects the four overarching principles of the *Statutory Framework for the Early Years Foundation Stage*:

- *A Unique Child*

Every child is a unique child who is constantly learning and can be resilient, capable, confident and self-assured.

- *Positive Relationships*

Children learn to be strong and independent through positive relationships.

- *Enabling Environments*

Children learn and develop well in enabling environments with teaching and support from adults, who respond to their individual interests and needs and help them to build their learning over time. Children benefit from a strong partnership between educators, parents and/or carers.

- *Learning and Development*

- Children develop and learn at different rates. The framework covers the education and care of all children in early years provision including children with special educational needs and disabilities (SEND).

How we provide for learning and development

Children start to learn about the world around them from the moment they are born. The care and education offered by our setting helps children to continue to do this by providing all the children with interesting activities that are appropriate for their age and stage of development.

The Areas of Learning and Development comprise:

- *Prime Areas*

- Personal, social and emotional development.
- Physical development.
- Communication and language.
- *Specific Areas*
 - Literacy.
 - Mathematics.
 - Understanding the world.
 - Expressive arts and design.

For each area, the level of progress that children are expected to have attained by the end of the Early Years Foundation Stage is defined by the Early Learning Goals. These goals state what it is expected that children will know, and be able to do, by the end of the reception year of their education.

We refer to non-statutory curriculum guidance to support our professional judgment as we assess each child's progress and level of development as they progress toward the Early Learning Goals. We have regard to these when we assess children and plan for their learning by creating a curriculum that is ambitious and meets every child's needs. Our educational programs support children to develop the knowledge, skills and understanding they need for:

Personal, social and emotional development

- self-regulation
- managing self
- building relationships

Physical development

- gross motor skills
- fine motor skills

Communication and language

- listening, attention and understanding
- speaking

Literacy

- comprehension
- word reading
- writing

Mathematics

- number
- numerical patterns

Understanding the world

- past and present
- people, culture and communities
- the natural world

Expressive arts and design

- creating with materials
- being imaginative and expressive

Our approach to learning and development and assessment

Learning through play

Being active and playing supports young children's learning and development through doing and talking. This is how children learn to think about and understand the world around them. We use the EYFS education programs and elements adopted from planning in the moment to plan and provide opportunities that will help children to make progress in all areas of learning. This program is made up of a mixture of activities that children plan and organise for themselves, and activities planned and led by educators'.

Characteristics of effective learning

We understand that all children engage with other people and their environment through the characteristics of effective learning that are described in the Early Years Foundation Stage as:

- playing and exploring - engagement
- active learning - motivation
- creating and thinking critically - thinking

We aim to provide for the characteristics of effective learning by observing how a child engages with learning and being clear about what we can do and provide to support each child to remain an effective and motivated learner.

Assessment

We assess how young children are learning and developing by observing them. We use information that we gain from observations of the children, to understand their progress and where this may be leading them. We believe that parents know their children best, and we will ask you to contribute to assessment by sharing information about what your child likes to do at home and how you, as parents/carers, are supporting development.

We may make periodic assessment summaries of children's achievement based on our on-going observations. These help us to build a picture of a child's progress during their time with us and form part of children's records of achievement/learning journeys. We undertake these assessment summaries at regular intervals, as well as at times of transition, such as when a child moves into a different group or when they go on to school.

The progress check at age two

The Early Years Foundation Stage requires that we supply parents and carers with a short-written summary of their

child's development in the three prime areas of learning and development - personal, social and emotional development; physical development; and communication and language - when a child is aged between 24 - 36 months. Your child's key person is responsible for completing the check using information from on-going observations carried out as part of our everyday practice, taking account of the views and contributions of parents and other professionals.

learning journeys

We keep a learning journey for each child. Your child's learning journey helps us to celebrate together her/his achievements and to work together to provide what your child needs for her/his well-being and to make progress.

Your child's key person will work in partnership with you to keep this record. To do this you and they will collect information about your child's needs, activities, interests and achievements. This information will enable the key person to identify your child's progress. Together, we will then decide on how to further support your child's learning and development.

Working together for your children

We maintain the ratio of adults to children in the setting that is set by the Safeguarding and Welfare Requirements. We may also have volunteer parent/carer helpers, where possible, to complement these ratios. This helps us to:

- give time and attention to each child
- talk with the children about their interests and activities
- help children to experience and benefit from the activities we provide
- allow the children to explore and be adventurous in safety

The staff who work at our setting are:

Name	Job Title	Qualifications and Experience
Sarah Hiscock	Manager	L4 in childcare and development L3 SENCO Designated Safeguarding Lead SEN support experience 24 years of experience

Bonnie Hiscock	Deputy Manager	L3 in childcare and development Deputy Safeguarding Lead Health and safety officer Fire Marshal 6 years' of experience
Michelle Taylor	Supervisor	L6 in childcare and development Fire marshall Behaviour management lead 14 years of experience
Brooke Snelling	Key person	L3 in childcare and development 2 years' of experience
Katie Smith	Key person	L2 in childcare and development 2 years' of experience
Elizabeth Teahan	Key person	L3 in childcare and development Child phycology degree 3 years' of experience
Ellie-May Smith	Key person	L3 in childcare and development 4 years' of experience
Angela Ward	Key person/bank staff	L2 in childcare and development 8 years' of experience
Beata Parry	SEN support/bank staff	L3 in childcare and development 8 years' of experience
We are open for	38 weeks per year	

The times we are open are 8.30 am – 3.30 pm

We provide care and education for young children between the ages of:

2 and 4 years.

How parents/carers take part in the setting

Our setting recognises parents/carers as the first and most important educators of their children. All our staff see themselves as partners with parents/carers in providing care and education for their children. There are many ways in which parents/carers take part in making our setting a welcoming and stimulating place for children and parents/carers, such as:

- exchanging knowledge about their children's needs, activities, interests and progress with our staff
- contributing to the progress check at age two
- helping at sessions of the setting
- sharing their own special interests with the children
- helping to provide and look after the equipment and materials used in the children's play activities
- being part of the committee or FOSP (friends of Swanmore Preschool)
- taking part in events and informal discussions about the activities and curriculum provided by the setting
- joining in community activities, in which the setting takes part
- building friendships with other parents/carers in the setting

Joining in

Our setting offers stay-and-play sessions each term and we welcome parents who wish to offer their help during a session.

Parents/carers can also offer to take part in a session by sharing their own interests and skills with the children. We welcome parents/carers to drop into the setting to see it at work or to speak with the manager.

Key person and your child

Our setting uses a key-person approach. This means that each member of staff shares a group of children for whom they are particularly responsible. Your child's key person will be the person who works with you to make sure that the childcare and early education that we provide is right for your child's particular needs and interests. When your child first starts in the setting, they will help your child to settle and throughout your child's time at the setting, they will help your child to benefit from our activities.

Learning opportunities for adults

As well as gaining relevant qualifications, our staff take part in further training to help them to keep up-to date with thinking about early years care and education. We also keep up to date with best practice, as a member of the

Early Years Alliance, through *Under 5* magazine, Alliance training on EYA Central, Noodle Now, SFYC and other publications produced by the Alliance. Occasionally, we hold learning events for parents/carers.

The setting's timetable and routines

Our setting believes that care and education are equally important in the experience which we offer children. The routines and activities that make up the day in our setting are provided in ways that:

- help each child to feel that she/he is a valued member of the setting
- ensure the safety of each child
- help children to gain from the social experience of being part of a group

provide children with opportunities to learn and help them to value learning

The session

We organise our sessions so that the children can choose from, and work at, a range of activities and, in doing so, build up their ability to select and work through a task. The children are also helped and encouraged to take part in adult-led small and large group activities, which introduce them to new experiences and help them to gain new skills, as well as helping them to learn to work with others. Outdoor activities contribute to all areas of learning and development, including their health and their knowledge of the world around them. The children have the opportunity, and are encouraged, to take part in outdoor child-chosen and adult-led activities, as well as those provided indoors. We offer a free-flow environment offering the children a choice of where they can access their learning through play.

Policies

Our staff can explain our policies and procedures to you. Copies of which are available within the setting and on our website.

www.swanmorepreschool.org.uk

Our policies help us to make sure that the service we provide is of high quality and that being a member of the setting is an enjoyable and beneficial experience for each child and her/his parents.

Our staff and parents/carers work together to adopt the policies, and they all can take part in the annual review of the policies. This review helps us to make sure that the policies are enabling our setting to provide a quality service for its members and the local community.

Safeguarding children

Our setting has a duty under the law to help safeguard children against suspected or actual 'significant harm'. Our employment practices ensure that people looking after children are suitable to fulfil the requirements of their role and help to protect children against the likelihood of abuse in our setting and we have a procedure for managing

complaints or allegations against a member of staff.

Our way of working with children and their parents/carers ensures that we are aware of any problems that may emerge and can offer support, including referral to appropriate agencies, when necessary, to help families in difficulty.

Special educational needs

To make sure that our provision meets the needs of each individual child, we take account of any special educational needs a child may have. We work to the requirements of the Special Educational Needs and Disability Code of Practice: 0 to 25 years (2015).

Our Special Educational Needs Co-ordinator is Sarah Hiscock

The management of our setting

Our setting is a charity and as such is managed by a volunteer management committee - whose members are elected by the parents of the children who attend our setting. The elections take place at our Annual General Meeting. The committee make up the registered person with Ofsted and are responsible for:

- managing our finances
- employing and managing our staff
- making sure that we have, and work to, policies that help us to provide a high-quality service
- making sure that we work in partnership with parents

The Annual General Meeting is open to the parents of all the children who attend our setting. It is our shared forum for looking back over the previous year's activities and shaping the coming year's plan.

Fees

The fees are currently £ 8.00 per hour payable half-termly in advance. Fees must still be paid if children are absent without notice for a brief period. If your child must be absent over an extended period, talk to the manager.

For your child to keep her/his place at [our/my] setting, you must pay the fees. We are in receipt of nursery education funding for two-, three- and four-year-olds; where funding is not received, then fees apply.

Starting at our setting

Settling in/visit session

We provide this to allow parents time with the child's key person to complete final paperwork such as "all about me" document and to allow the child to become familiar with our environment. We encourage parents to say goodbye and leave for a short time during this session. This helps to prepare the child that parents/carers come back to collect them.

We want your child to feel happy and safe with us. To make sure that this is the case, our staff will work with you to

decide on how to help your child to settle into the setting. Our policy on the role of the key person and Settling-in is enclosed with this document.

We hope that you and your child enjoy being members of our setting and that you both find taking part in our activities interesting and stimulating. Our staff are always ready and willing to talk with you about your ideas, views or to respond to any questions.

Waiting list and admissions

We aim to ensure that all sections of the community receive accessible information, and that our admissions procedures are fair, clear, and open to all parents who apply for a place.

- The setting is widely advertised in places accessible to all sections of the community.
- Information about the setting is accessible, using plain English, in written and spoken form and, where appropriate, provided in different community languages and in other formats on request.
- Children with disabilities are supported to take full part in all activities within the setting and the setting makes reasonable adjustments to ensure that this will be the case from the time the child is placed on the waiting list.
- The waiting list is arranged in birth order and in addition may consider the following:
 - the age of the child with priority being given to children eligible for the free entitlement
 - length of time on the waiting list
 - siblings are already attending the setting.
 - the capacity of the setting to meet the individual needs of the child.
- Funded places are offered in accordance with the Early Years Entitlements: Operational Guidance for local authorities and providers (DfE 2018) and any local conditions in place at the time,
- Where it is financially viable to do so, a place is kept vacant for emergency admissions.
- The setting and its practices are welcoming and make it clear that fathers, mothers, other relations and carers and childminders are all welcome.
- The setting and its practices operate in a way that encourages positive regard for and understanding of difference and ability, whether gender, family structure, class, background, religion, ethnicity, or competence in spoken English.

Funded places – free entitlement

All 3- and 4-year-olds in England are entitled to 15 hours free childcare each week for 38 weeks of the year. Some eligible 2-year-olds are also entitled to funding. Funded places are offered in accordance with national and local codes of practice and adherence to the relevant Provider Agreement/Contract with the local authority.

<https://www.childcarechoices.gov.uk/>

Admissions

- Once a childcare place has been offered the relevant paperwork is completed by the setting manager or deputy before the child starts and filed on the child's personal file. Forms completed include:
 - 07.1a Privacy notice - explains what personal data we collect, why we collect it, how we use it, the control parent/carers have over their personal data and the procedures we have in place to protect it.
 - 09.1d Childcare terms and conditions - govern the basis by which we provide childcare.
 - 09.1c Childcare registration form - contains personal information about the child and family that must be completed in full prior to the child commencing.
 - Information letter including snack contributions information.
 - A welcome pack will be shared with the family on their visit settling in session. This includes the steppingstones of our curriculum.

All staff attend staff meetings prior to the enrolment of new children, where information relevant about the child is shared, such as any additional needs, or medical conditions. Safeguarding concerns forms, Health care plans and allergy information are completed where necessary.

SEND

The manager must seek to determine an accurate assessment of a child's needs at registration. If the child's needs cannot be met within the setting's core budget, then an application for SEN inclusion funding must be made immediately.

Children with identified SEND must be offered a place when one becomes available as with any other child. However, the start date for children with more complex SEND will be determined by the preparations made to ensure the child's safety, well-being, and accessibility in the setting. If a child's needs determine that adjustments need to be made, the manager must outline a realistic timeframe for completion, detailing the nature of adjustments e.g. risk assessment, staff training, health care plan and all other adjustments required. The child's safety is always paramount.

At the time of registration, the manager must check to see if a child's family is in receipt of Disability Living Allowance, if so, the manager must ask for evidence to enable them to claim the Disability Access Fund directly from the local authority. If the family is eligible but not in receipt of the allowance, the setting manager will support the family in their application. More information can be found at www.gov.uk/disability-living-allowance-children/how-to-claim.

Preparation for admitting a child with SEND must be made in a reasonable amount of time and any delay in the child's starting is examined by the setting manager to avoid discrimination and negative impact on the child and family. During a preparation period the family and relevant agencies and the local authority must be regularly updated on the progress of the preparations.

Safeguarding/child protection

If information is provided by the parents that a child who is starting at the setting is currently, or has been involved with social care, the designated person will contact the agency to seek further clarification.

Parents are advised on how to access the setting's policies and procedures.

Further guidance

Early Years Entitlements: Operational guidance for local authorities and providers (DfE 2018)
https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/718181/

Absence

We take steps to ensure that children are kept safe, that their wellbeing is promoted, and they do not miss out on their entitlements and opportunities. At the very least, good attendance promotes good outcomes for children. In a small minority of cases, good attendance may also lead to early identification of more serious concerns for a child or family.

There are several reasons why a child may be absent from a setting. In most cases it is reasonable to expect that parents/carers alert the setting as soon as possible, or in the case of appointments and holidays give adequate notice. Parents are advised that they should contact the setting within one hour of the time the child would have been expected to advise of their absence. Designated safeguarding lead must also adhere to Local Safeguarding Partners (LSP) requirements, procedures and contact protocols for children who are absent or missing from childcare.

- If a child who normally attends fails to arrive and no contact has been received from their parents, the designated person takes immediate action to contact them to seek an explanation for the absence and be assured that the child is safe and well.
- Attempts to contact the child's parents or other named carers continue throughout the day on the first day of absence.
- If no contact is made with the parents and there is no means to verify the reason for the child's absence i.e. through a named contact on the child's registration form, this is recorded as an unexplained absence on the child's personal file and is followed up by the manager each day until contact is made.
- If contact has not been made within three working days, children's services will be contacted for advice about making a referral. Other relevant services may be contacted as per LSP procedures.
- All absences are recorded on the child's personal file with the reason given for the absence, the expected duration and any follow-up action taken or required with timescales.
- Absence records are retained for at least three years, or until the next Ofsted inspection following a cohort of children moving on to school.

If at any time further information comes to light that gives cause for concern, procedure 06.1 Responding to safeguarding or child protection concerns is immediately followed.

Poor/irregular attendance

Whilst attendance at an early year's setting is not mandatory, regular poor attendance may be indicative of safeguarding and welfare concerns that should be followed up.

- In the first instance the setting manager should discuss a child's attendance with their parents to ascertain any potential barriers i.e. transport, working patterns etc and should work with the parent/s to offer support where possible.
- If poor attendance continues and strategies to support are not having an impact, the setting manager must review the situation and decide if a referral to a multi-agency team is appropriate.
- Where there are already safeguarding and welfare concerns about a child or a child protection plan is in place, poor/irregular attendance at the setting is reported to the Social Care worker without delay.

In the case of funded children, the local authority may use their discretion, where absence is recurring or for extended periods, considering the reason for the absence and impact on the setting. The setting manager is aware of the local authority policy on reclaiming refunds when a child is absent from a setting.

'Each child must be assigned a key person' (EYFS 2021)

Babies and young children need to form a secure attachment to key person when they join the setting to feel safe, happy, and eager to participate and learn.

Safeguarding vulnerable children

- The designated person or key person attempts to contact the parents to establish why the child is absent. If contact is made and a valid reason given, the information is recorded in the child's file.
- Any relevant professionals involved with the child are informed, e.g. social worker/family support worker.

- If contact is made and the designated person is concerned that the child is at risk, the relevant professionals are contacted immediately. The events, conversation and follow-up actions are recorded. If contact cannot be made, the designated person contacts the relevant professionals and informs them of the situation.
- If the child has current involvement with social care, the social worker is notified on the day of the unexplained absence.
- If at any time information comes to light that gives cause for concern, 06 Safeguarding children, young people and vulnerable adults procedures are followed immediately.

Safeguarding

- If a child misses three consecutive sessions and it has not been possible to make contact, the designated person calls Social Care and makes a referral if advised.
- If there is any cause for concern, i.e. the child has a child protection plan in place or there have been previous safeguarding and welfare concerns, the designated person attempts to contact the child's parent/carer immediately. If no contact is made, the child's absence is logged on 06.1b Safeguarding incident reporting form, and Social Care are contacted immediately, and safeguarding procedures are followed.

Settling in and transitions.

To feel securely settled and ready to learn, children need to form attachments with the adults who care for them, primarily a key person, but others too. In this way they feel part of a community; they can contribute to that community and receive from it. Very young children, especially two- to three-year-olds, approach separation from their parent with anxieties, older children have a more secure understanding of 'people permanence' and can approach new experiences with confidence; but also need time to adjust and feel secure. It is the entitlement of all children to be settled comfortably into a new environment.

We follow a three-stage model of settling in based on three key needs:

1. *Proximity* - Babies and young children feel safest when a familiar adult, such as a parent, is present when they are getting used to new carer and new surroundings. In this way they can become confident in engaging with those experiences independently later.
2. *Secure base* - Because the initial need for proximity of the parent has been met, babies and young children gradually begin to feel secure with a key person in a new surrounding so that they are able to participate independently for small periods of time.
3. *Dependency* - Babies and young children can separate from parents' and main carers when they have formed a secure attachment to their key person who knows and understands them best and on whom they can depend for their needs to be met.

Settling-in Two-year-olds and those with SEND

- If a child has been identified as having SEND then the key person/SENCO and parents will need to identify and address potential barriers to settling in e.g. timings of medication and invasive procedures, specific routines and levels of support.
- A two-year-old may have little or no experience of group care. As part of gathering information from parents, it is important to find out about the child's experience of non-parental care, for example grandparents, or childminder; this informs staff as to how a child may respond to a new situation.
- The three-stage approach involving *Proximity*, *Secure Base* and *Dependency/Independence* is applied to

two-year-olds as to younger children.

- After the induction meeting with the setting manager or deputy and key person, a settling-in plan is drawn up. Where possible, a home visit is carried out for the same purpose.
- To settle in a two-year-old, the setting will go through the same process of gradually increasing the time a child attends with a parent/carer during the proximity stage.
- Parents are only encouraged to say goodbye and leave for a short period of time during the child's visit session if the child seems happy and content.
- Separation causes anxiety in two-year-olds, as they have no idea where their parents have gone. Parents should always say goodbye and tell them when they will return. Patience with the process will ensure children are happy and eager to come to play and be cared for in the setting.

Three- and four-year-olds

- Most children of this age can move through the stages more quickly and confidently.
- Some children take longer, and their needs for proximity and secure base stages should be accommodated as much as possible.
- Some children appear to leap to dependency/independence within a couple of days. In most cases, they will revert to the need for proximity and secure base. It can be difficult to progress to true dependency/independence and this can be frustrating.
- On the first day, visit session, the parent attends with the child and stays to liaise with their child's key person and may leave their child for a short period of time that is agreed with the key person.

The key person role

- A key person builds an on-going relationship with the child and their parents/carers and is committed to that child's well-being while in the setting.
- Every child that attends is allocated a key person before they begin settling in - it is not the responsibility of the child to choose their own key person.
- Where possible a 'back up' key person is also identified for each child so that they can fulfil the role in the absence of the main key person, for example, during annual leave or sickness.
- The key person conducts the progress check at age two for their key children.
- The role is fully explained to parents/carers on induction and the name of the child's key person and 'back up' key person is recorded on the child's registration form.
- The key person is central to settling a child into the setting. The setting manager and key person explain the need for a settling in process and agree a plan with the parents.
- Shift patterns and staff absence can affect a child who is just settling in; where possible, settling in should be matched to when the key person is on duty.
- The number of children for each key person considers the individual needs of children and the capacity of the key person to manage their cohort; it is also influenced by part-time places and part time staff. The setting manager should aim for consistency i.e. matching part-time staff to part-time children; full-time children should not be divided between key persons during the week.

- Photographs of key persons and their key groups are displayed clearly.
- The key person spends time daily with his or her key group to ensure their well-being.

Parents/carers

- Key persons are the first point of contact for parents regarding matters concerning their child and any concerns parents/carers may have been addressed with the key person in the first instance.
- Key persons support parents/carers in their role as the child's first and most enduring educators.
- The key person is responsible for the child's developmental records, completing the progress check at age two, and for sharing information about progress with the child's parents/carers.

Learning and development

- The key person helps to ensure that every child's learning and care is tailored to meet their individual needs. This is achieved through regular observation and assessment of children, using information gathered about their achievements, interests and learning styles to plan for each individual child's learning and development.
- If a child's progress in any of the prime areas gives cause for concern, the key person must discuss this with the setting manager or SENCO and the child's parents/carers.

For children whose first language is not English

- For many children learning English as an additional language, the stage of proximity takes longer as the child is dependent upon the parents' input to make sense of what is going on.
- If the parent does not speak English, efforts are made to source an interpreter for induction; it will be helpful for them to see around the setting and be clear about their role in interpreting in the play area.
- The settling-in programme is explained to the parent, and it is emphasised how important it is that they stay with the child and talk to him/her in the home language to be able to explain things.
- Through the interpreter, the key person will try to gauge the child's level of skills in their home language; this will give the key person an idea of the child's interests and levels of understanding.
- The need for the parent to converse in the child's home language is important.
- The key person makes the parent feel welcome using smiles and gestures.
- With the parent, make a list of key words in the child's home language; sometimes it is useful to write the word as you would pronounce it. These words will be used with the child and parents will be addressed with 'hello' and 'goodbye' in their language.
- The key person prepares for the child's visits by having a favourite toy or activity ready for the child to provide a means to interact with the child.
- Children will be spoken to as per any other child, using gestures and facial expressions to help.
- When the child feels happy to spend time with the key person (secure base), the parent should spend time outside of the room.
- Progress with settling in will be done as with any other child; it just takes a little longer to reach dependency/independence.

Safeguarding children

- The key person has a responsibility towards their key children to report any concern about their development, welfare, or child protection matter to the setting manager and to follow the procedures in this respect.
- Regular supervision with the setting manager provides further opportunities to discuss the progress and welfare of key children.
- The back-up key person has a duty likewise.

Further guidance

[Being a Key Person in an Early Years Setting](#) (Alliance Publication)

Establishing children's starting points

When children start at the setting they arrive at different levels of learning and development. To help them to settle and make rapid progress they must be provided with care and learning opportunities that are suited to their needs, interests, and abilities. This means establishing and understanding their starting points and whether there are any obstacles to their learning, so that teaching can be tailored to the 'unique child'.

- The aim of establishing a child's starting points is to ensure that the most appropriate care and learning is provided from the outset.
- Starting points are established by gathering information from the first contact with the child's parents at induction and during the 'settling in' period. Staff do not 'wait and see' how the child is settling before they begin to gather information. We include "All About Me" document in our welcome pack which is completed with parents during the visit session.
- The key person is responsible for establishing their key children's starting points by gathering information in the following ways:
 - observation of the child during settling in visits
 - discussion with the child's parents
 - building on information that has been gathered during registration by referring to the registration form

The information gathered is recorded within the first term of the child's official start date and sooner where possible, subject to attendance.

- The key person must make a 'best fit' judgment about the age band the child is working in, referring to Development Matters or Birth to Five Matters.
- The key person should complete details by indicating where they have gathered their evidence from, using more than one source where possible i.e. parent comment and observation during settling in.

Progress check at age two

- A template for completing the two-year-old progress check is provided as 09.15a Progress check at age two template.
- The key person is central to the progress check and must be the person completing it.
- Settings should take guidance from their local authority as to when the progress check at age two is completed; if no such guidance is provided, the progress check is completed when the child is between 26 and 30 months old. The child should be attending the setting for at least 1 term before the check is completed.
- Once the timing of the child's progress check is confirmed, parents/carers are invited to discuss their child's progress at a mutually convenient time.
- The setting must seek to engage both parents/carers and make allowance for parents/carers who do not live with their child to be involved.

Completing the progress check at age two

- On-going observational assessment informs the progress check and must be referred to.
- Children's contributions are included in the report. Staff must be 'tuned in' to the ways in which very young children, or those with speech or other developmental delay or disability, communicate/

- Where any concerns about a child's learning and development are raised these are discussed with the parents/carers, the SENCo and the setting manager.
- If concerns arise about a child's welfare, they must be addressed through 06 Safeguarding children, young people and vulnerable adults procedures.
- The key person must be clear about the aims of the progress check as follows:
 - to review a child's development in the three prime areas of the EYFS
 - to ensure that parents have a clear picture of their child's development
 - to enable educators to understand the child's needs and, with support from educators, enhance development at home
 - note areas where a child is progressing well and identify any areas where progress is less than expected
 - describe actions the provider intends to take to address any developmental concerns (working with other professionals as appropriate)

Prime times - arrivals and departures

Prime times of the day make the very best of routine opportunities to promote 'tuning-in' to the child emotionally and to create opportunities for learning. Arrivals and departures are key times in the day when children need support from their carer to make the transition smooth and happy; these times of day also pose a certain level of risk as parents and carers come and go. All staff are aware of the potential risks and take measures to minimise them.

Arrivals

- Whenever possible the key person or back up key person always greets young children into the main room. This ensures that young children are received into the setting by a familiar and trusted adult.
- Children are encouraged to self-register.
- The Manager or room supervisor marks their presence and time of arrival in the register.
- If a child who is expected fails to arrive, this is recorded on the child's personal file and the setting manager is immediately notified so that they can contact the child's parents to find out why the child is absent following procedure 09.2 Absence.
- The manager or deputy ensures that the child has been signed in by the parent/carer and there is a clear indication of who will be collecting the child, and at what time.
- The manager/deputy greets the parents and takes time to hear information the parents need to share. They inform the parents of aspects of the day, such as if there is an agency member of staff or flexible worker in, which members of staff will be around later when parents collect their child, any planned outings, or special planned event. Any consent forms are signed.
- The key person receives the child physically and tunes in to how he or she is feeling and prepares to meet his/her needs.
- Parents should spend a few minutes with their child and key person before leaving. Many parents will be in a hurry, but this can have an unsettling effect.
- Always ensure that the parents say goodbye to their child and say when they are coming back, such as 'after tea', rather than just 'later'.
- If the member of staff receiving the child is not the key person, the member of staff will hand over the information shared by the parents to the key person when they arrive.

Injuries noted on arrival

- If a child is noted to have visible injuries when they arrive at the setting procedure 6.1 is followed.

Changing shifts and handing over information

- When the key person leaves or goes on a break, they handover the care of the child to a 'back-up' key person.
- If someone other than the key person receives the child, he/she will share any information from the parent and write a note for the key person. Confidential information should be shared with the setting manager to pass on.
- The key person shares information with the back-up key person, in this way they ensure that all information is passed on to the parent in the key person's absence.

Departures

- Children are prepared for home, with clean faces, hands and clothes if required.
- The key person always aims to greet parents when they arrive, ensuring that the person who has arrived to collect the child is named on the signing in/out form. They hand over the child personally and enter the time of departure in the register.
- Only people aged over 16 years should normally collect children. If a parent has no alternative, then this is agreed with the setting manager and a risk assessment completed and signed by the parent. In all cases the setting manager will ask the parents to ensure that in future alternative arrangements are made. If the parent is under 16 years of age a risk assessment will be completed. No child will be collected by anyone who has not reached 14 years of age. The risk assessment should take account of factors such as age/vulnerability of child, journey travelled, arrangements upon leaving the setting to go home/elsewhere.
- Practitioners verbally exchange information with parents. Families are advised that they may arrange a meeting to discuss their child at a time that suits them. This would be arranged by the manager.
- If someone other than the key person is with the child at the end of the day, the key person should pass general information to the other staff or write a note for the parents. Confidential information should be shared with the setting manager to pass on.

Maintaining children's safety and security

Arrivals and departures pose a particular threat to the safety and security of children, particularly when parents arrive at the same time or when in shared premises. To minimise the risk of a child leaving the building unnoticed, the setting manager conducts a risk assessment that identifies potential risks and the measures put in place to minimise them, such as staff busy talking to individual parents or doors left ajar. The risk assessment is shared with their line manager and is updated as and when required. View procedure O1.1 Risk assessment and O1.1a Generic risk assessment form for further guidance.

Snack and meals

Children are supervised during mealtimes and always remain within sight and hearing of staff.

- A 'snack' is prepared mid-morning and can be organised according to the discretion of the setting manager e.g. picnic on a blanket.
- Children may also take turns to help set the table. Small, lidded plastic jugs are provided with choice of Semi-skimmed milk or water. Their water bottles are always available.
- Children wash their hands before and after snack-time.
- Fruit or raw vegetables, such as carrot or tomato, are offered in batons, which children should be encouraged to help in preparing. Bananas and other foods are not cut into rounds but are sliced to minimise a choking hazard.
- Portion sizes are gauged as appropriate to the age of the child.
- Children arrive as they want refreshment and leave when they have had enough. Children are not made to leave their play if they do not want to have a snack.
- Staff join in the conversation and encourage children's independence by allowing them to pour drinks, butter toast, cut fruit etc.

Mealtimes

- Tables are never overcrowded during mealtimes. Some social distancing is encouraged even though it is

acknowledged that children will play in proximity for the rest of the session.

- Children wash their hands and sit down at a chosen table with their lunchboxes.
- Children bring their lunches in packed lunch boxes with cold packs, these are stored in a cool area.
- Staff may have their lunch with children occasionally. Staff who are always eating with the children role-model healthy eating and best practice, for example not drinking cans of fizzy drinks in front of the children.
- Children are given time to eat at their own pace and are not hurried to fit in with adults' tasks and breaks. They are not made to eat what they do not like and are only encouraged to try new foods slowly.
- To protect children with food allergies or specific dietary requirements, children are discouraged from sharing and swapping their food with one another.
- Mealtimes are relaxed opportunities for social interaction between children and the adults who care for them.
- Children go to the bathroom and wash their hands after lunch.
- Information for parents is displayed on the parent's notice board, including:
 - Ten Steps for Healthy Toddlers
https://infantandtoddlerforum.org/media/upload/pdf-downloads/HR_toddler_booklet_green.pdf
 - Daily menus including identification of any foods containing allergens

Intimate care and nappy changing

Prime times of the day make the very best of routine opportunities to promote 'tuning-in' to the child emotionally and to create opportunities for learning. Children's privacy is maintained during nappy changing and toileting, whilst balanced with safeguarding considerations Nappy changing times are key times in the day for being close and promoting security as well as for communication, exploration and learning.

Nappy changing records.

- Key people record when they changed a child and if cream has been used.
- A stool that is an unusual colour can usually be related to the food that was eaten, so it is important that this is noted. However, a stool that is black, green, or very white indicates a problem, and the child should be taken to the doctor.

Very soft, watery stools are signs of diarrhoea; strict hygiene needs to be carried out in cleaning the changing area to prevent spread of infection. The parents should be called immediately to collect their child, who must be taken to the doctor. The child must have passed at least 2 formed stools before returning.

- Sometimes a child may have a sore bottom. This may have happened at home as a result of poor care; or the child may have eaten something that, when passed, created some soreness. The child also may be allergic to a product being used. This must be noted and discussed with the parents and a plan devised and agreed to help heal the soreness. This may include the use of nappy cream. If a medicated nappy cream such as Sudocrem is used, this must be recorded as per procedure 04.2 Administration of medicine.

Young children, intimate care and toileting

- Wherever possible, key persons undertake changing young children in their key groups; back-up key persons change them if the key person is absent.
- Changing areas are warm, appropriately sited and there are safe areas to lay young children if they need to have their bottoms cleaned. There are mobiles or other objects of interest to take the child's attention.
- If children refuse to lie down for nappy change, they can be changed whilst standing up, providing it is still possible to clean them effectively.
- Each young child has his/her own bag to hand with their nappies/pull ups and changing wipes.
- Key persons ensure that nappy changing is relaxed and a time to promote independence in young children.
- Young children are encouraged to take an interest in using the toilet; they may just want to sit on it and talk to a friend who is also using the toilet.
- They are encouraged to wash their hands and have soap and paper towels to hand. They should be allowed time for some play as they explore the water and the soap.
- Anti-bacterial hand wash liquid or soap should not be used by young children, as they are no more effective than ordinary soap and water.
- Key persons are gentle when changing and avoid pulling faces and making negative comments about the nappy contents.
- Wipes or cotton wool and water are used to clean the child. Where cultural practices involve children being washed and dried with towels, staff aim to make reasonable adjustments to achieve the desired results in consultation with the child's parents. Where this is not possible it is explained to parents the reasons why. The use of wipes or cotton wool and water achieves the same outcome whilst reducing the risk of cross infection from items such as towels that are not 'single use' or disposable.
- Key people do not make inappropriate comments about young children's genitals when changing their nappies.
- Older children use the toilet when needed and are encouraged to be independent.
- Members of staff do not wipe older children's bottoms unless there is a need, or unless the child has asked.
- Key people are responsible for changing where possible. Back-up key persons take over in the key person's absence, but where it is unavoidable that other members of staff are brought in, they must be briefed as to their responsibilities towards designated children, so that no child is inadvertently overlooked and that all children's needs continue to be met.
- Parents are encouraged to provide enough changes of clothes for 'accidents when children are potty training.
- If spare clothes are kept by the setting, they are 'gender neutral' i.e. neutral colours, and are clean, in good condition and are in a range of appropriate sizes.
- If young children are left in wet or soiled nappies/pull-ups in the setting, this may constitute neglect and will be a disciplinary matter.

Nappy changing is always done in an appropriate/designated area.

Safe sleep policy

Swanmore Pre-school operates a Safe Sleep Policy that specifies "back to sleep" position. Our policy requires that

the key person or manager discuss the Safe Sleep Policy with a child's parent or guardian before admission. Parents must sign a statement that they received a copy of the policy and that the policy has been discussed with them. All key persons working in our nursery are required to receive induction training on the Safe Sleep Policy.

When introducing or sharing the policy with our parents the following will be discussed:

- Ask about the Child's sleep position at home
- Explain the "back to sleep" policy that is implemented to reduce the risk of Sudden Infant Death Syndrome (SIDS).
- Tell the Parents that "Back to Sleep" is recommended by the Foundation Of Sudden Infant Death Syndrome (FSIDS).
- Inform the parents that even though most babies will be fine, there is a higher risk of SIDS when an infant is placed to sleep on their stomach or side.
- Some babies have medical conditions that require stomach sleeping .If the parent insists that their baby be placed on his /her stomach or side to sleep, they will be asked to provide a note from the baby's doctor that specifies the sleeping position ;this note will be placed within the baby area or sleep room.
- If parents have further questions about SIDS and infant sleeping positions, they will be given the phone number for the FSIDS and the national Back to Sleep campaign.

Safe sleep policy

Sudden Infant Death Syndrome (SIDS)is the unexpected death of a seemingly healthy baby for whom no cause of death can be determined based on an autopsy, an investigation of the place where the baby died and a review of the baby's medical history.

In the belief that proactive steps can be taken to lower the risk of SIDS in childcare settings and that parents and childcare professionals can work together to keep babies safer while they sleep. Swanmore Pre-school will practice the following sleep policy:

- All key persons will receive training on our Safe Sleep Policy and SIDS risk reduction.
- A child will always be placed on their backs to sleep unless there is a signed sleep position medical waiver on file. A copy will be given to the keyperson.
- FSIDS recommends that babies are placed on their backs to sleep, but when babies can easily turn over from the back to stomach, they can be allowed to adopt whatever position they preference when the baby turns onto his/her side or stomach.
- Visual supervision is always required. At least every 15 minutes the key person will visually check on the child; looking for the rise and fall of the chest and if the sleep position has changed. We will be especially alert to monitor a sleeping child during the first weeks in our care.
- Steps will be taken to keep children from becoming too warm or over heating by regulating the room temperature, avoiding excess bedding and not overdressing or over-wrapping the baby; room temperature will be kept between 16-20 degrees.
- No smoking is permitted on the premises and key persons who smoke will ensure that their clothes and breathe do not smell of smoke when caring for caring for babies or any other children within the nursery.

Sleep and rest times are key times in the day for being close and promoting security. Younger children will need to sleep but older children do not usually need to. No child is made to sleep.

Children over 2yrs old and young children

- Children sleep on rest mats.
- Children have a suitable place to store clothes, shoes and a special toy, book, or comforter for sleep. All children have a coat hook and a personalised tray.
- Nappies changed and heavier clothing removed.
- Hair accessories that may become lost or detached are removed before sleep/rest time.
- A separate area is made quiet.
- Children are settled by their key person where possible and comforted to sleep. Key persons may gently stroke or pat children.
- Sleeping children are regularly checked at least every ten minutes and are within sight and/or hearing of staff.

[Safer Sleep for Babies](http://www.lullabytrust.org.uk/safer-sleep-advice) (Lullaby Trust) www.lullabytrust.org.uk/safer-sleep-advice

09.12 Promoting positive behaviour

Positive behaviour is located within the context of the development of children's personal, social, and emotional skills and well-being. A key person who understands children's needs, their levels of development, personal characteristics, and specific circumstances, supports this development. This ensures children's individual needs are understood and supported. Settling into a new environment is an emotional transition for young children especially as they learn to develop and master complex skills needed to communicate, negotiate, and socialise with their peers. Skills such as turn taking and sharing often instigate minor conflicts between children as they struggle to deal with powerful emotions and feelings. During minor disputes, key persons help children to reflect and regulate their actions and, in most instances, children learn how to resolve minor disputes themselves. However, some incidents are influenced by factors, requiring a strategic approach especially if the behaviour causes harm or distress to the child or others. These situations are managed by the SENCO/key person using a stepped approach which aims to resolve the issue and/or avoid the behaviour escalating and causing further harm.

This is an unsettling time for young children. Practitioners are alert to the emotional well-being of children who may be affected by the disruption to their normal routine. Where a child's behaviour gives cause for concern, practitioners take into consideration the many factors that may be affecting them. This is done in partnership with the child's parents/carers and the principles of this procedure are adhered to

The setting manager/SENCO will:

- ensure that all new staff attend training on behaviour management such as *Understanding and Addressing Behaviour in the Early Years* that available on EYA Central
- help staff to implement procedure 09.12 Promoting positive behaviour in their everyday practice.
- advise staff on how to address behaviour issues and how to access expert advice if needed.

Rewards and sanctions

Children need consistent messages, clear boundaries, and guidance to intrinsically manage their behaviour through

self-reflection and control.

Rewards such as excessive praise and stickers may provide immediate results for the adult but do not teach a child how to act when a 'prize' is not being given or provide the skills to manage situations and emotions themselves. Instead, a child is taught to be 'compliant' and respond to meet adult expectations to obtain a reward (or for fear of a sanction). If used the type of rewards and their functions must be carefully considered.

Children are never labelled, criticised, humiliated, punished, shouted at, or isolated by removing them from the group to be left in 'time out' or on a 'naughty chair'. If a child is distressed or causing harm to others, it may help to remove them from the immediate environment where the incident occurred. They should be taken to a quiet area by their key person for up to 5 minutes to help them calm down. If appropriate, the key person can use this time to help the child reflect on what has happened. Physical punishment is never used or threatened which could adversely affect a child's well-being. If staff become aware that another person has given corporal punishment to a child, they follow 06 Safeguarding children, young people and vulnerable adults procedures. Physical intervention to safeguard a child/children must be carried out as per the guidance in this procedure.

Step 1

- The setting manager, SENCo and other relevant staff members are knowledgeable with and apply the procedure 09.12 Promoting positive behaviour.
- Unwanted behaviours are addressed using an agreed and consistently applied approach to deescalate situations.
- Behaviours that result in concern for the child and/or others must be discussed by the key person, SENCo/setting manager. During the meeting the key person must use their all-round knowledge of the child and family to share any known influencing factors such as a new baby in the family, child and/or parental illness, underlying additional needs to help place the child's behaviour into context.
- Appropriate adjustments to practice must be agreed within the setting. If relevant, a risk assessment should be carried out.
- If the adjustments are successful and the unwanted behaviours does not reoccur, or cause concern then normal monitoring can resume.

Step 2

- If the behaviours remains a concern, then the key person and SENCo must liaise with the parents to try to discover possible reasons for the behaviours and to agree next steps. If relevant and appropriate the views of the child must be sought and considered to help identify a cause.
- If a cause for the behaviours is not known or only occurs whilst in the setting, then the setting manager/SENCo must suggest using a focused intervention approach to identifying a trigger for the behaviours such as the ABC approach, i.e. Antecedents - what happened before; Behaviours - what was the behaviours observed; Consequences - what happened after the event.
- If a trigger is identified, then the SENCo and key person must meet with the parents to plan support for the child through a graduated approach via SEN support.
- Aggressive behaviours by children towards other children will result in a staff member intervening immediately to stop the behaviours and prevent escalation using the agreed initial intervention approach. If the behaviours has been significant or may have a detrimental effect on the child, the parents of the victim of the behaviours and the parents of the perpetrator must be informed. If the setting has applied a physical intervention, they must follow the guidance as set out below. The designated person completes 6.1b Safeguarding incident reporting form and contact Ofsted if appropriate. A record of discussions is recorded and parents are asked to sign.
- Parents must also be asked to sign risk assessments where the risk assessment relates to managing the

behaviours of a specific child.

- If relevant, actions for dealing with the behaviours at home are agreed with parents and incorporated into the action plan. Other staff are informed of the agreed interventions and help implement the actions. The plan must be monitored and reviewed regularly by the key person/SENCo until improvement is noticed.
- Incidents and intervention relating to unwanted/challenging behaviours by children must be clearly and appropriately logged on 09.13b SEN Support - Action plan.

Step 3

If despite applying initial intervention to deescalate situations and focused interventions to identify triggers the child's behaviours continues to occur and/or is of significant concern, the SENCo and key person invite the parents to a meeting to discuss external referral and next steps for supporting the child. It may be agreed that the setting request support from the Early Help team and/or other specialist services such as the Area ISSO. This will help address most developmental or welfare concerns. If the behaviours is part of other welfare concerns that include a concern that the child may be suffering or likely to suffer significant harm, safeguarding procedures 06 Safeguarding children, young people and vulnerable adults procedures must be followed immediately.

- Advice provided by external agencies is incorporated in 09.13b SEN Support: Action Plan and regular multi-disciplinary meetings held to review the child's progress.
- If a review determines a statutory assessment may be needed then all relevant documentation must be collected in preparation for an Education Health and Care Assessment which may lead onto an Education, Health and Care Plan.

Use of physical intervention

Staff will already use different elements of physical contact with a child as part of their interaction in the setting, especially when they are comforting a child or giving first aid. However, physical intervention to keep a child or other children safe is different and should only be applied in exceptional circumstances.

The EYFS states that physical intervention from a staff member towards a child may be used for the purposes of "averting immediate danger of personal injury to any person (including the child) or to manage a child's behaviour if it is absolutely necessary".

Staff must do all they can to avoid using a physical intervention because this is not the preferred way of addressing children's behaviour.

To offer protection to children a range of appropriate graded interventions may be needed before physical intervention is applied. Most single incidents such as a child throwing a book on the floor or kicking a chair usually only require verbal intervention from a member of staff. In other situations, an intervention can be applied through mechanical and environmental means such as locking doors and stair gates. This usually stops a situation escalating. However, there will be some situations where a child places themselves or others in danger which require an immediate need for the use of both verbal and physical intervention. If a single or persistent incident requires a physical intervention such as physical handling from a staff member towards a child, then this is used intentionally to restrict a child's movement against their will. In most cases this can be applied using the adult's body gently and safely blocking the child from access to danger or to prevent danger.

To physically intervene, a practitioner may use "reasonable force" to protect a child from injuring themselves or others. Legally a practitioner may also use reasonable force to prevent a child from damaging property. However, we would expect that in instances of damaging physical property a child would only experience a physical intervention if the broken property presented a risk or is high value.

If a situation arises which requires urgent physical hands-on intervention this is best applied by the staff who knows the child well such as their key person who is more able to calm them or use other known methods for defusing situations without physical intervention.

Physical handling

We use the principle of applying reasonable minimal force and handling in proportion to the situation. Staff use as little force as necessary to maintain safety. This intervention should only be used for as short a period as possible to keep the child safe and maintain well-being by aiming for:

- keeping the child's safety and well-being paramount
- a calm, gentle but firm approach and application of the intervention
- never restricting the child's ability to breathe
- side-by-side contact with the child
- no gap between theirs or the child's body
- keeping the adults back as straight as possible
- avoiding close head-to-head positioning to avoid injury to the child and themselves (head butting)
- only holding the child by their 'long' bones to avoid grasping at the child's joints where pain and damage are most likely to occur.
- avoiding lifting the child unless necessary
- reassuring the child and talking about what has happened.
- only applying a physical intervention on a disabled child if training or preferred method is provided from a reputable external source e.g. British Institute of Learning Disabilities www.bild.org.uk/

Risks

There are risks associated with any physical intervention and handling of a child. The younger and more vulnerable a child may be, the greater risk to the child of using physical intervention towards them. However, there are also risks to children associated with not intervening physically; for instance, if a practitioner did not take hold of a child by the wrist, they may have run into the path of a fast-moving car.

Before intervening physically to protect a child from immediate harm a practitioner needs to decision make in a split second, considering the following factors. This is described as dynamic risk assessment.

- What is the immediate risk to this child if I do not intervene now?
- What might the risks be if I do intervene? If this was my child, what would I want someone looking after them to do in this situation?
- What is the minimum level of intervention that will be effective here? How can I do this as gently as possible for as short a time as possible and how am I going to manage to stay calm?

Recording

Any instance of physical intervention is fully recorded immediately and reported to the designated person as soon as possible on 6.1b Safeguarding incident reporting form, ensuring that it is clearly stated when and how parents were informed. Parents are asked to sign a copy of the form which is then kept on the child's file. The designated person decides who will notify the parent and when, ensuring that the parent signs to say they have been notified. An individual risk assessment should be completed after any physical intervention with a child which considers the risks and likelihood of such behaviour re-occurring and how this will be managed. The risk assessment should be agreed and signed by parents.

Temporary suspension (fixed term)

Any decision to temporarily suspend a child must be carefully considered lawful, reasonable and fair. If despite following the stepped approach for behaviour it is necessary to temporarily suspend a child, for no more than five days, on the grounds of health and safety, the following steps are followed.

- The setting manager provides a written request to suspend a child to their line manager; the request must detail the reason why the child must be suspended and the length of time of the proposed suspension.
- If the line manager approves, the parents must be invited to a meeting to discuss next steps. Parents are invited to bring a representative along. Notes must be taken at the meeting and shared later with the parents. The meeting must aim for a positive outcome for the child and not to suspend.
- If no acceptable alternative to suspension is found then the setting manager must give both verbal and written notice of time related suspension to the parent, meanwhile the setting manager must ensure that continued resolution is sought and suitable adjustments are in place for the child's return.

Suspension of a disabled child

We have a statutory duty not to discriminate against a child based on a protected characteristic. This includes suspending a child based on a disability. Ignorance of the law or claiming it was unknown that a child was disabled is no defense. However, if the child's behaviour places themselves or others at risk then the setting must take actions to avoid further harm. Time limited suspension may be applied to keep the child and/or others safe whilst finding a solution. Suspension is only used if reasonable steps and planned adjustments are first used to help resolve the situation. Without this action, suspension of a child with SEND may constitute disability discrimination (Equality Act 2010). A decision to suspend a disabled child must be clearly evidenced, specific, measurable, achievable, realistic and targeted. Plans and intervention must be recorded on the child's file and 9.12b SEN Support - Action plan. If little or no progress is made during the suspension period, the following steps are taken.

- The setting manager sends a written/electronic invite to the parents, a local authority representative and any relevant external agencies to attend a review meeting. Each attendee must be made aware that the meeting is to avoid the situation escalating further and to find a positive solution.
- After the meeting the setting manager continues to maintain weekly contact with the parents and local authority to seek a solution.
- Suitable arrangements offer the parent continued support and advice during the suspension. The setting manager reviews the situation fortnightly and provides their line manager with a monthly update.

Expulsion

In some exceptional circumstances a child may be expelled due to:

- a termination of their childcare agreement as explained in 9.1d Childcare terms and conditions
- if despite applying a range of interventions (including reasonable adjustments), the setting has been unable to adequately meet the child's needs or cannot protect the health, safety, and well-being of the child and/or others.

Challenging unwanted behaviour from adults in the setting

We do not tolerate behaviour demonstrating dislike, prejudice, discriminatory attitudes, or action towards any individual/group. This includes those living outside the UK (xenophobia). This also applies to behaviour towards specific groups of people and individuals who are British Citizens residing in the UK.

Allegations of discriminatory remarks or behaviour made in the setting by any adult will be taken seriously. The perpetrator will be asked to stop the behaviour and failure to do so may result in the adult being asked to leave the premises. Where a parent makes discriminatory or prejudice remarks to staff at any time, or other

persons while on the premises, this is recorded on the child's file and is reported to the setting manager. The procedure is explained, and the parent is asked to comply while on the premises. An 'escalatory' approach will be taken with those who continue to exhibit this behaviour. The second stage comprises a letter to the parent requesting them to sign a written agreement not to make discriminatory remarks or behave in discriminatory or prejudice ways; the third stage may be considering withdrawing the child's place.

09.13 Identification, assessment and support for children with SEND

We have regard for the Special Educational Needs and Disability (SEND) (DfE and DoH 2015) which states that local authorities must ensure that all early year's providers that they fund in the maintained, private, voluntary and independent sectors are aware of the requirement on them to meet the needs of children with SEN and disabilities. When securing funded early education for two, three- and four-year-olds local authorities should promote equality and inclusion for children with disabilities or SEN; this includes removing barriers that prevent access to early education and working with parents to give each child support to fulfil their potential. During the Covid outbreak we will review and update children's SEN support plans more frequently to ensure their progress and well-being.

The term SEN support defines arrangements for identifying and supporting children with special educational needs and/or disabilities. We are required to offer appropriate support and intervention and to promote equality of opportunity for children that we care for. Children's SEND generally falls within the following four broad areas of need and support:

- communication and interaction
- cognition and learning
- social, emotional and mental health
- sensory and/or physical needs

Graduated approach

Initial identification and support (identifying special educational needs)

- Ongoing formative assessment forms part of a continuous process for observing, assessing, planning and reviewing children's progress.
- Children identified as having difficulty with one or more area of development should be given support by applying some simple strategies and resources.
- For most children application of some simple differentiation approaches will be enough to build confidence and help the child develop, 9.12a SEN Support: Initial record of concern form can be used for this purpose.
- If despite applying differentiated strategies a child continues to struggle and is showing significantly more difficulty with learning than their peers or has a disability which requires specific adjustments, then the key person should raise a concern with the setting's SENCo/setting manager and the child's parents.

Observation and assessment of children's SEN

Where a child appears to be behind expected levels, or their progress gives cause for concern, practitioners should consider all the information about the child's learning and development from within and beyond the setting.

- Information can be collated from formal checks such as the progress check at age two, observations from parents and observation and assessment by the setting of the child's progress.
- When specialist advice has been sought externally, this is used to help determine whether or not a

child has a special educational need (SEN). The child's key person and SENCo/Manager use this information to decide if the child has a special educational need.

- If the decision is that the child does have a SEN and the parents are not already aware of a concern, then the information is shared with them. Once parents have been informed, they should be fully engaged in the process, contributing their insights to all future actions for their child.

Planning intervention

- Everyone involved with the child should be given an opportunity to share their views. Parents should be encouraged to share their thoughts on the child's difficulties and be involved in the decision as to what will happen next.
- A first intervention option may be to carry on with applying differentiated support and to review the child's progress at an agreed date. If the child's needs are more complex, then the decision maybe to go straight ahead and prepare 09.13b SEN support: Action plan with detailed evidence-based interventions being applied straight away and simultaneously external referrals made.
- If relevant, then the child should be appropriately included in the development of the action plan but only at a level which reflects their stage of comprehension.
- 09.13b SEN support: Action plan described below, ensures that children that are identified, or suspected of having a SEN will receive the right level of support and encouragement with their learning and development as early as possible.

Involving the child

- The SEND Code of Practice supports the rights of children to be involved in decisions about their education.
- Inclusion of children with SEND helps build self-confidence and trust in others.
- Ascertaining children's views may not be easy, a range of strategies will be needed.
- Accurate assessment helps identify children's strengths and possible barriers to learning.
- The key person and setting manager/SENCo work in partnership with parents and other agencies to involve the child wherever appropriate.
- Children are involved at appropriate stages of the assessment and to their level of ability.
- Establishing effective communication is essential for the child's involvement.

SEN action plan

- 09.13b SEN support: Action plan, should show what support is required to help achieve outcomes for the child and detail the frequency of these interventions and who will apply them and with what resources.
- A review date (at least termly) should be agreed with the parents so that the child's progress can be reviewed against expected outcomes and next steps agreed.
- A copy of the plan is stored in the child's file so that any other member of staff or an inspector looking at the file will see how the child is progressing and what interventions have been or are being applied.
- If a child requires specific medical interventions during their time in the setting, 04.2a Health care plan form should also be completed and integrated into the general plans to ensure the child's medical needs are known and safely met.
- The action plan should provide an accessible summary of the child's needs, which can be used if further assessment is required including a statutory Education Health and Care (EHC) Assessment, and development of an EHC plan.

Drawing up a SEN action plan

- If external agencies are already involved at this stage, then they should also be invited to help decide on what appropriate interventions are needed to help meet outcomes for the child. The SENCo/setting manager should take the lead in coordinating further actions including preparation of the action plan and setting short-term targets.
- Where there are significant emerging concerns (or an identified special educational need or disability), targeted action plans are formulated that relate to a clear set of expected outcomes and stretching targets.
- 09.13b SEN support: Action plan, highlights areas in which a child is progressing well; areas in which some additional support might be needed and any areas where there is a concern that a child may have a developmental delay (which may indicate a special educational need or disability). It describes the activities and strategies the provider intends to adopt to address any issues or concerns.
- Planned intervention should be based on the best possible evidence and have the required impact on progress with longer-term goals covering all aspects of learning and development and shorter-term targets meeting goals.
- The plan should focus on the needs of the child, the true characteristics, preferences, and aspirations of the child and involvement of the parents with a clear set of targets and expected outcomes for the child. Effective planning at this stage should help parents and children express their needs, wishes, and goals:
 - focus on the child as an individual and not their SEN label
 - be easy for children to understand and use clear ordinary language and images, rather than professional jargon
 - highlight the child strengths and capacities, enable the child, and those who know them best, to say what they have done, what they are interested in and what outcomes they are seeking in the future
 - tailor support to the needs of the individual, organise assessments to minimise demands on families
 - bring together relevant professionals to discuss and agree together the overall approach
- If the child fails to make progress and multi-agency support is sought, then it is at this point that Early Help/CAF assessment should be considered.

Record keeping

If a child has or is suspected of having a SEN, a dated record should be kept of:

- the initial cause for concern and the source of this information, (the progress check at age two and/or outcomes of previous interventions). 09.13a SEN support: Initial record of concern form can also be used for this purpose drawing information from other sources
- the initial discussion with parents raising the possibility of the child's SEN
- the views of the parents and other relevant persons including, wherever possible, the child's views;
- the procedures followed with regard to the Code of Practice to meet the child's SEND e.g. SEN action plan, referrals to external agencies and for statutory assessment
- evidence of the child's progress and any identified barriers to learning
- advice from other relevant professionals; and all subsequent meetings with parents and other persons and any subsequent referrals

Records may include:

observation and monitoring sheets

expressions of concern
risk assessments
access audits (O1.1b)
health care plans (including guidelines for administering medication)
SEN action plans
meetings with parents and other agencies
additional information from and to outside agencies
agreements with parents
guidelines for the use of children's individual equipment; Early help CAF referrals
referral to the local authority identifying a child's special educational needs and request for statutory Education, Health, Care (EHC) needs assessment; and a copy of an EHC plan

Seeking additional funding/enhanced/top up

If the child's needs cannot be met from within the setting's core funding, then it will be at this point that the evidence collated will be used to apply for top up/enhanced funding from the local authority's inclusion fund. If a new or existing child is disabled, then the setting should check if the family is in receipt or have applied for Disability Living Allowance. If so, the setting will be able to apply to their local authority for the local Disability Access Fund.

Statutory education, health and care (EHC) assessment and plan

Statutory assessment

- If a child has not made progress, then the next steps may be for the child to undergo an Education, Health and Care Assessment.
- If a child is under compulsory school age, the local authority will conduct an EHC needs assessment if they consider that the child's needs cannot be met within the resources normally available to the early years setting.
- When a child's needs appear to be sufficiently complex, or the evidence suggest specialist intervention then the local authority is likely to conclude that an EHC plan is necessary
- The local authority should fully involve the parents and must seek advice from the setting in making decisions about undertaking an EHC assessment and preparing an EHC plan.
- Settings should prepare by collating information about the child's SEND including:
 - documentation on the child's progress in the setting
 - interventions and support provided to date
 - evidence of external agency assessment, support and recommendations
 - parental views and wishes (and where appropriate those of the child)

The information will then be submitted to the local authority to allow them to accurately assess the child in the context of the support already given.

- The local authority must inform the child's parents of their decision within six weeks of receiving a request for an assessment and give its reasons for their decision. If the local authority decides to conduct an assessment, it must ensure the child's parents are fully included right from the beginning and are invited to contribute their views. If the local authority subsequently decides not to conduct an assessment it must then inform the parents of their right to appeal against that decision, of the requirement for them to consider mediation should they wish to appeal.
- If the local authority decides that a statutory EHC plan is not necessary, it must notify the parents and inform the provider, giving the reasons for the decision. This notification must take place within 16 weeks of the initial request or of the child having otherwise been brought to the local authority's attention

- If the decision following an assessment is to compile an EHC plan the local authority should consult collaboratively with the parents in the preparation of the plan ensuring that their views and their child's preferences are considered and that plans describe positively what the child can do and has achieved to date.
- Plans are evidenced based and focus on short term outcomes and long-term aspirations for the child including family and community support. Parents have the right to request a particular provision for their child to be named within their EHC plan.
- If an early year's setting is named, the local authority must fund this provision. They cannot force a setting to take a child and can only name the provision in the EHC if the setting agrees.
- Local authorities should consider reviewing an EHC plan for a child under age five at least every three to six months. Such reviews would complement the duty to carry out a review at least annually but may be streamlined and not necessarily require the attendance of the full range of professionals, depending on the needs of the child. The child's parents must be fully consulted on any proposed changes to the EHC plan and made aware of their right to appeal to the Tribunal.

External intervention and support

Where external agency intervention has been identified to help support a child with SEND then this intervention should be recommended in writing by a suitably reliable source such as a speech and language therapist, paediatrician or educational psychologist.

Ready, Steady, SENCO (Pre-school Learning Alliance 2018)

Prime times - Transition to school

Moving on to school is a major transition in a child's life involving separation from familiar adults and children. Older children have a more secure understanding of 'people permanence' and are able to approach new experiences with confidence. However, they need preparation if they are to approach transition to school with confidence and an awareness of what to expect.

Partnership with schools

- Details of the school that a child will be attending are recorded in the child's file along with the name of the reception class teacher.
- Every effort is made to forge and maintain strong links with all schools that children may attend. The setting manager will approach schools in order to open lines of communication where these have not previously existed.
- Details of the school's transition or settling in procedures are kept by the setting and are referred to so that members of staff are familiar with them and can develop a consistent approach to transition with teachers, parents and children.
- Teachers are welcomed into the setting and sufficient time is made for them to spend both with the child, their parents and with the key person, to discuss and share information that will support the child's transition to school.
- A child's EYFS profile and learning journey record is forwarded to the school along with other information that will aid transition and settling in. Parents receive a copy of this.
- Any action plans relating to a child's additional needs are also shared, where this is in place.
- Other formal documentation such as safeguarding information is prepared in line with procedure 07.6 Transfer of records.

-

Partnership with parents

- Key persons discuss transition to school with parents and set aside time to discuss learning and development summaries. Parents are encouraged to contribute to summaries.
- Key persons will discuss with parents how they are preparing their child for school and will share information about how the setting is working in partnership with the school to aid transition.
- Key persons will make clear to parents the information that will be shared with the school, for example, information regarding child protection and work that has taken place to ensure the child's welfare.

Increasing familiarity for children

- Where the setting is on, or adjacent to a school site, there will be opportunities for children to become familiar with staff and school premises, for example shared use of outdoor and indoor spaces, activities and resources.
- Where possible, the key person will take the child to visit the new school, if this is the school's transition policy.
- If there are several schools in a catchment area, or the setting is not within a reasonable distance of the school, other means of familiarisation will be explored. This could be through videos, photographs or other information about the school that can be shown within the setting. Staff may borrow resources from the schools and will use these with the children.

Preparing children for leaving

- Children and parents form bonds with adults and children in the setting and will need preparation for separating from the relationships they have formed.
- The child's last day should be prepared for in advance and marked with a special celebration or party that acknowledges that the child is moving on.
- Parents should not be discouraged from bringing the child for the occasional brief visit, as separations often take time to complete. Sometimes children need the reassurance that their nursery/pre-school is still there and that they are remembered.
